25X1

1. In 1954, a military area was established in a wood between Lomy (N 49-04, E 15-35) and Budkov (N 49-03, E 15-39), Moravske Budejovice district. The wood extends northwards from the Budkov-Lomy road, and only its southern boundary is visible, although a wire fence can be seen along part of the western and eastern edges of the wood. Warning notices were put up along the road forbidding unauthorized persons to stop. The wood has been enclosed by a fence and living quarters were built inside the enclosed area. On the highest point a metal aerial tower with a cabin has been installed. The purpose of the installation is not known among the local population, but the presence of military personnel contradicts the possibility that it might be a jamming station.

2. Soldiers in khaki uniforms were occasionally seen in the fenced off area. Except for a roof at the foot of the mast no buildings were observed.

3. Legend for the sketches 25X1

Sketch #1

(1) Wire fence along the Budkov-Louny road and along the western and eastern sides; the fence is not quite on the edge of the wood and in places it cannot be seen from the road. Along the road there are notices: "Military area - stopping prohibited."

(2) Steel tower on the highest point of the wood. The lower part is covered by trees but the upper part and a roof of the building at the foot of the mast can be seen.

Sketch #2

(1) Mast, steel framework, rectangular, narrowing towards the top.

(2) Cabin, about 20-25 meters above the ground. It was observed from a distance of about 400 meters and seemed to be of metal, round, about 3 meters in diameter and with a conical roof.

(3) Circular antenna.

(a) Supporting framework.
(b) Circular antenna consisting of 5 - 6 circles the largest of which is about 10 meters in diameter. All the circles are about the same distance from one another and get progressively smaller towards the middle. The funnel-like shape is opened towards the south and is at an angle with the vertical line. The data may be inaccurate due to the distance of observation.
